

CASPER SPLIT SUPER KING ADJUSTIBLE BED FOR SALE

The split Super King adjustable base supports 2 EU Single (90x200) mattresses for a split sleep setup with 2 remotes.

There are three different height options and the adjustable base can fit inside most standard bed frames without slats.

It can also be used on its own which how we used it directly on the floor.

A remote-controlled adjustable base lets you raise your head or feet and sleep just the way you like.

It's made from solid wood, steel, foam, fabric upholstery, electronics and motors.

It's a split Super King base with two separate mattresses (90 x 200) so each sleeper can adjust their side without disrupting their partner.

It cannot be used with spring mattresses or divans.

The two bases with the two mattresses cost £1615 in March this year. The mattresses have not been slept on directly as we had toppers on them. Asking price £900 ono.
